

Thickening Sludge - Minidrain MD 10

Henning Marschler Solutions (HMS) - Turnkey Solutions

Simple principle - compact and effective!

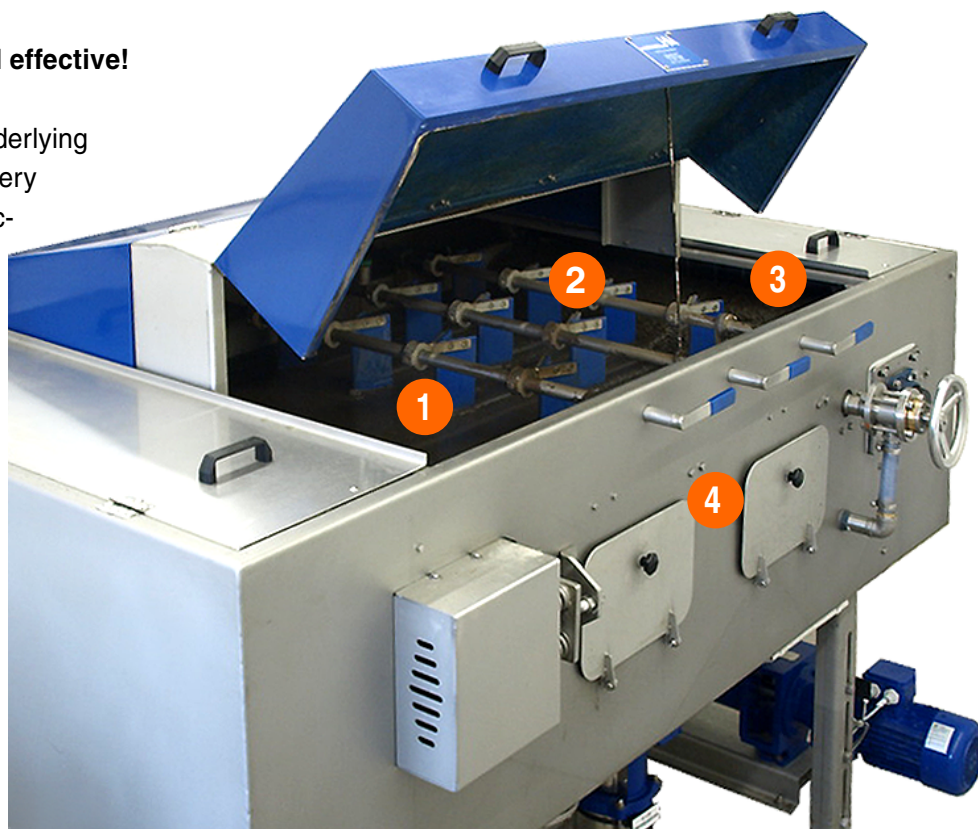

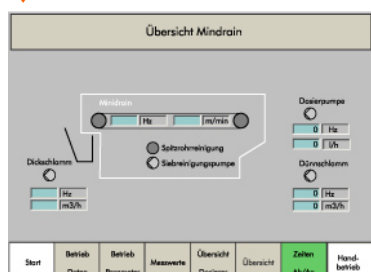

Like most good inventions the underlying principle behind the HMS MD is very simple yet its design and construction conceals years of accumulate xp

Stainless steel quality construction build by HMS

▲ The HMS MD in use at a sewage plant to treat industrial sewage

Flexible control concept;
intuitive user

Main components:

- 1 Filter belt
- 2 Chicanes
- 3 Ramp
- 4 Openings for maintenance purposes

Further benefits:

- Compact and mature technology
- High turnover
- Standard design which enables a high versatility
- High level of automation possible
- Fully developed process engineering
